

Supplementary Material for Evaluations of Dynamic Gaussian Splats versus Point Clouds for Sparse Captures

Simone Croci, Athanasios Charisoudis, Kit Yung Lam and Aljosa Smolic
Lucerne University of Applied Sciences and Arts, Rotkreuz, Switzerland

This document presents the supplemental material of the paper *Evaluations of Dynamic Gaussian Splats versus Point Clouds for Sparse Captures* (S. Croci *et al.*).

Figure 1 displays a screen clip of video stimuli with point cloud and Gaussian splat reconstructions, arranged in the same sequence as Figure 3 to Figure 8.

First, there is the analysis of the dynamic Gaussian splat (GS) reconstructions from the dataset mentioned in the paper. Second, there is the analysis of static reconstructions generated with a scene GS optimization method called Postshot from another paper *Gaussian Splatting vs. Classical Photogrammetry: A Comparison for Virtual Backdrops* (P. Haslbauer *et al.*).

I. STIMULI FOR THE SUBJECTIVE ASSESSMENT AND GAUSSIAN SPLAT ANALYSIS

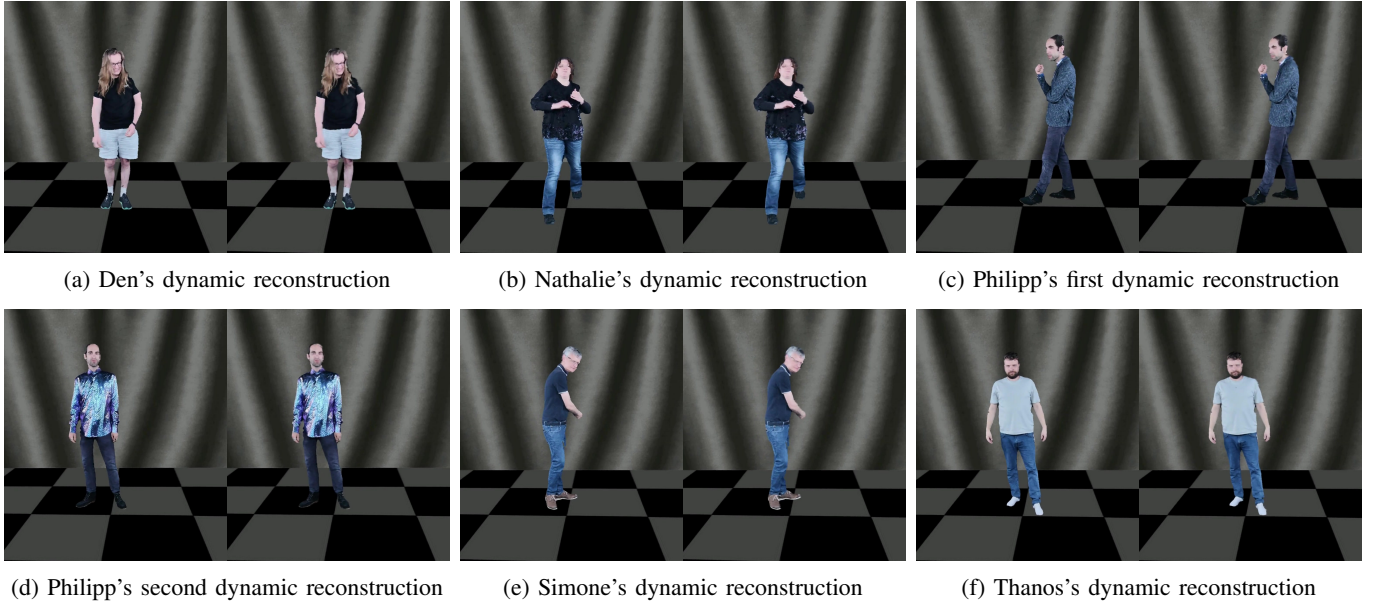

Fig. 1: Stimuli with point cloud and Gaussian splat reconstructions on the left and right, respectively. In the experiment, we also use the same reconstructions but with reversed order.

II. GAUSSIAN SPLAT ANALYSIS OF DYNAMIC RECONSTRUCTIONS

A. All Dynamic Reconstructions

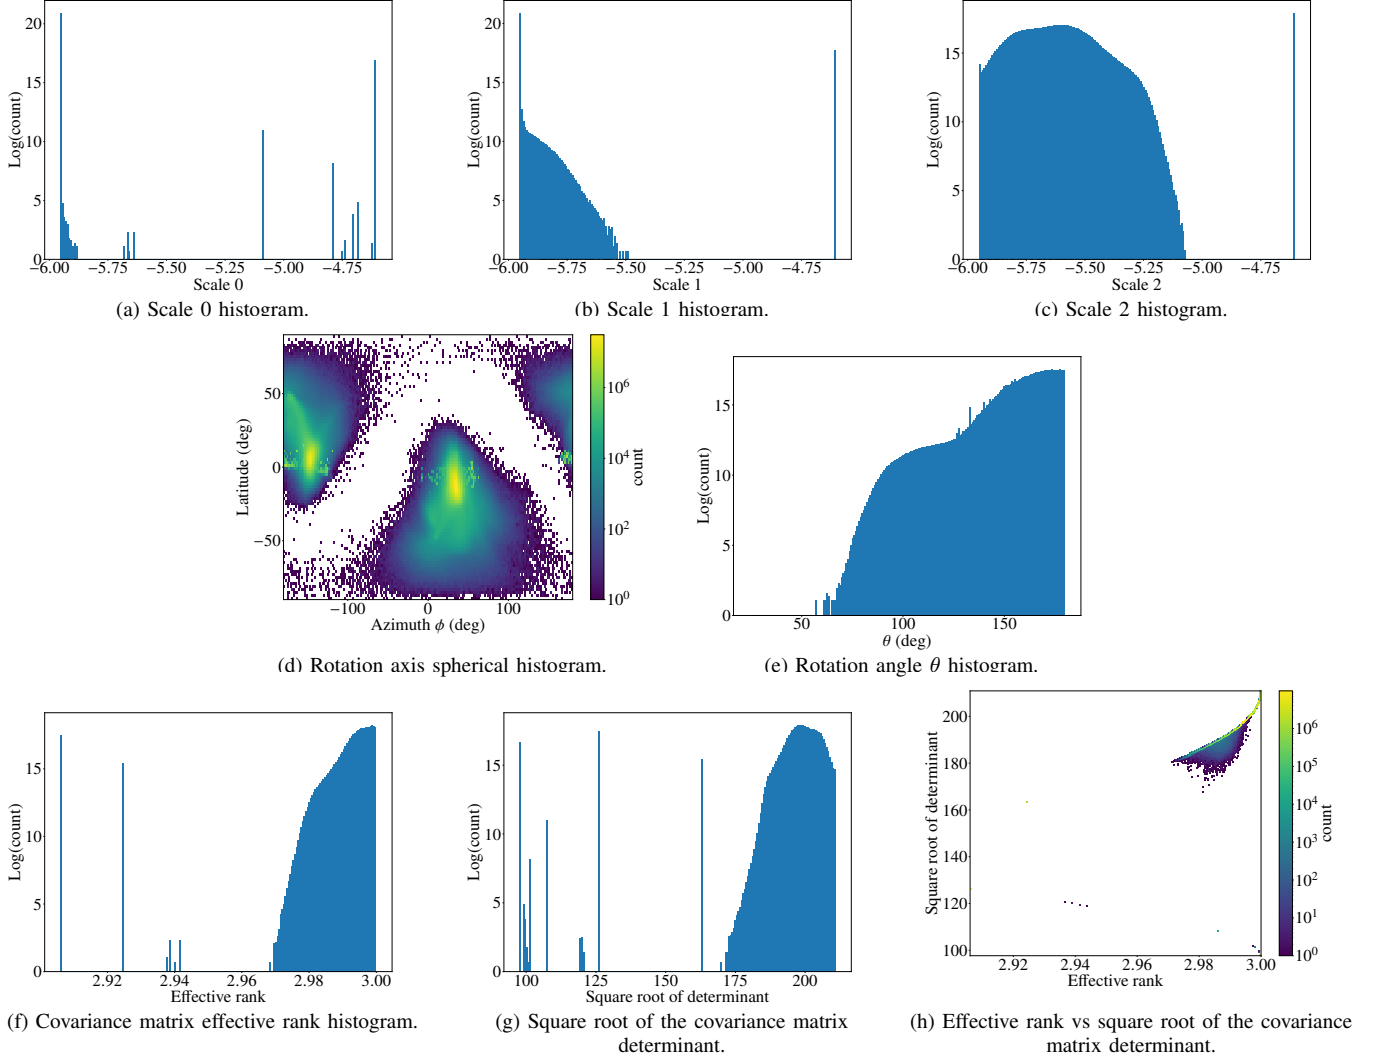

Fig. 2: Analysis of the Gaussian splats from all dynamic reconstructions.

B. Den's Dynamic Reconstruction

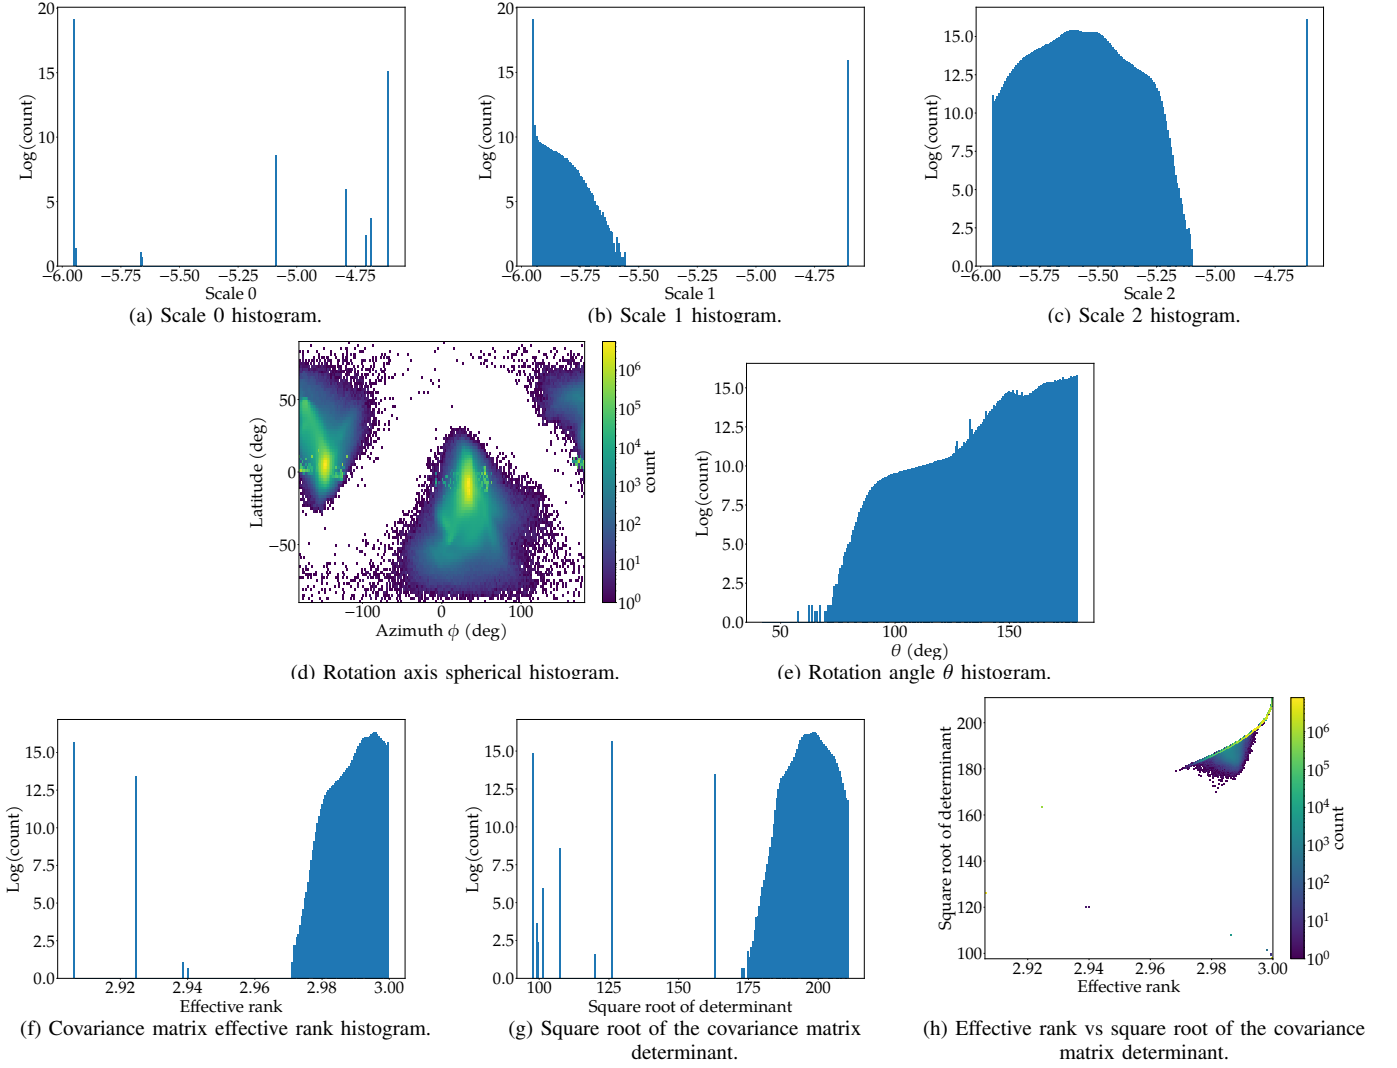

Fig. 3: Analysis of the Gaussian splats from Den's dynamic reconstruction.

C. Nathalie's Dynamic Reconstruction

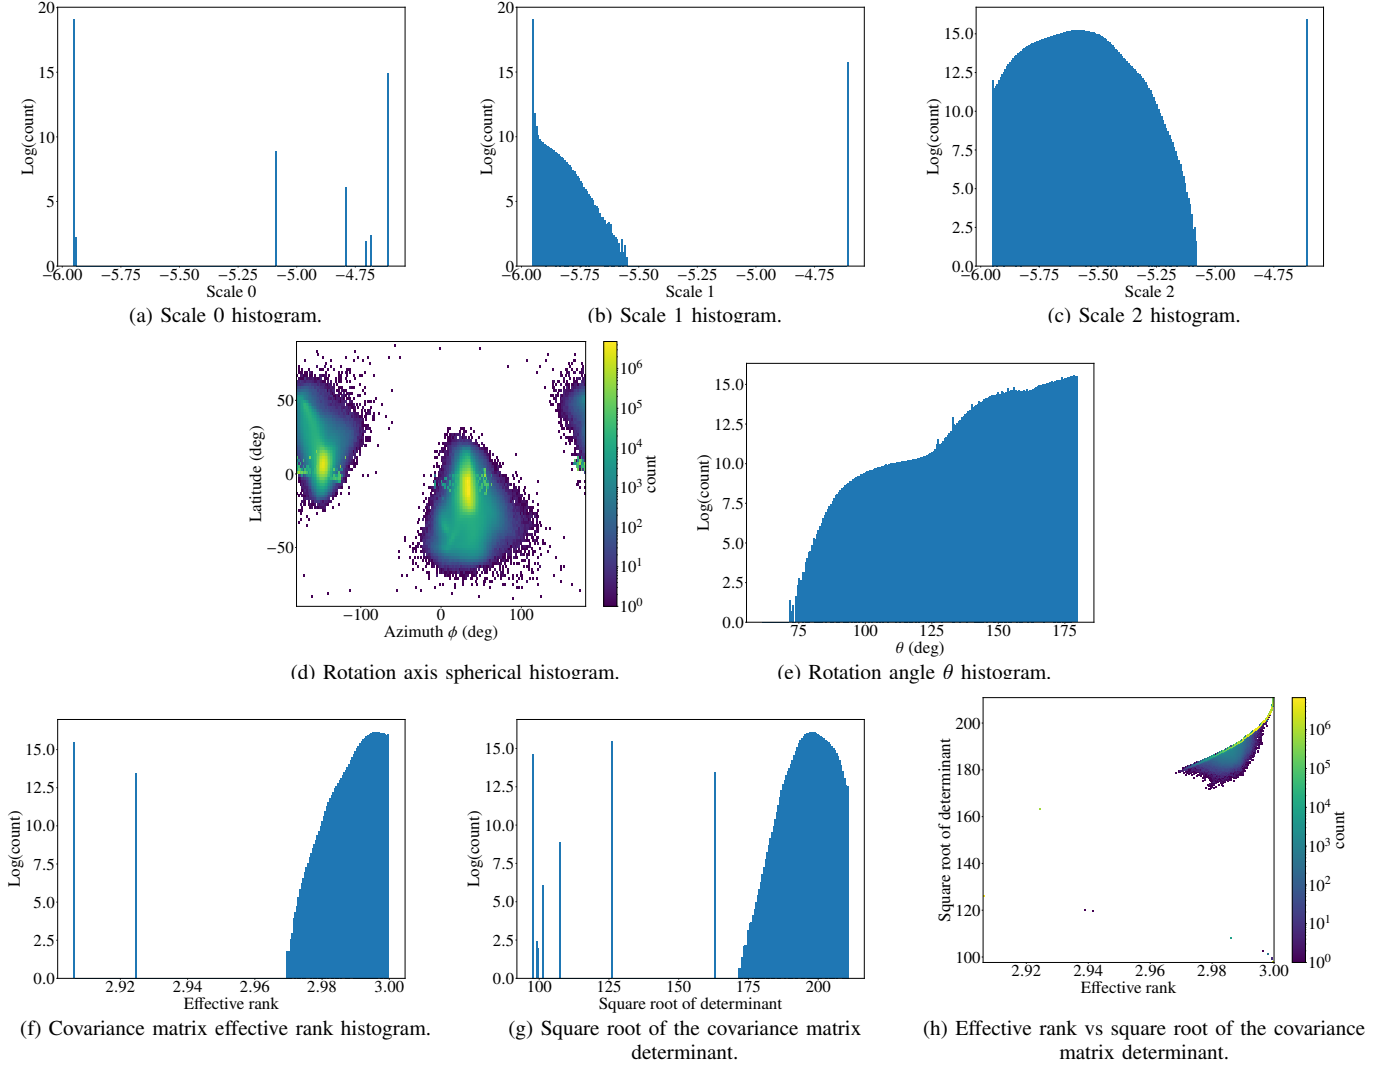

Fig. 4: Analysis of the Gaussian splats from Nathalie's dynamic reconstruction.

D. Philipp's First Dynamic Reconstruction

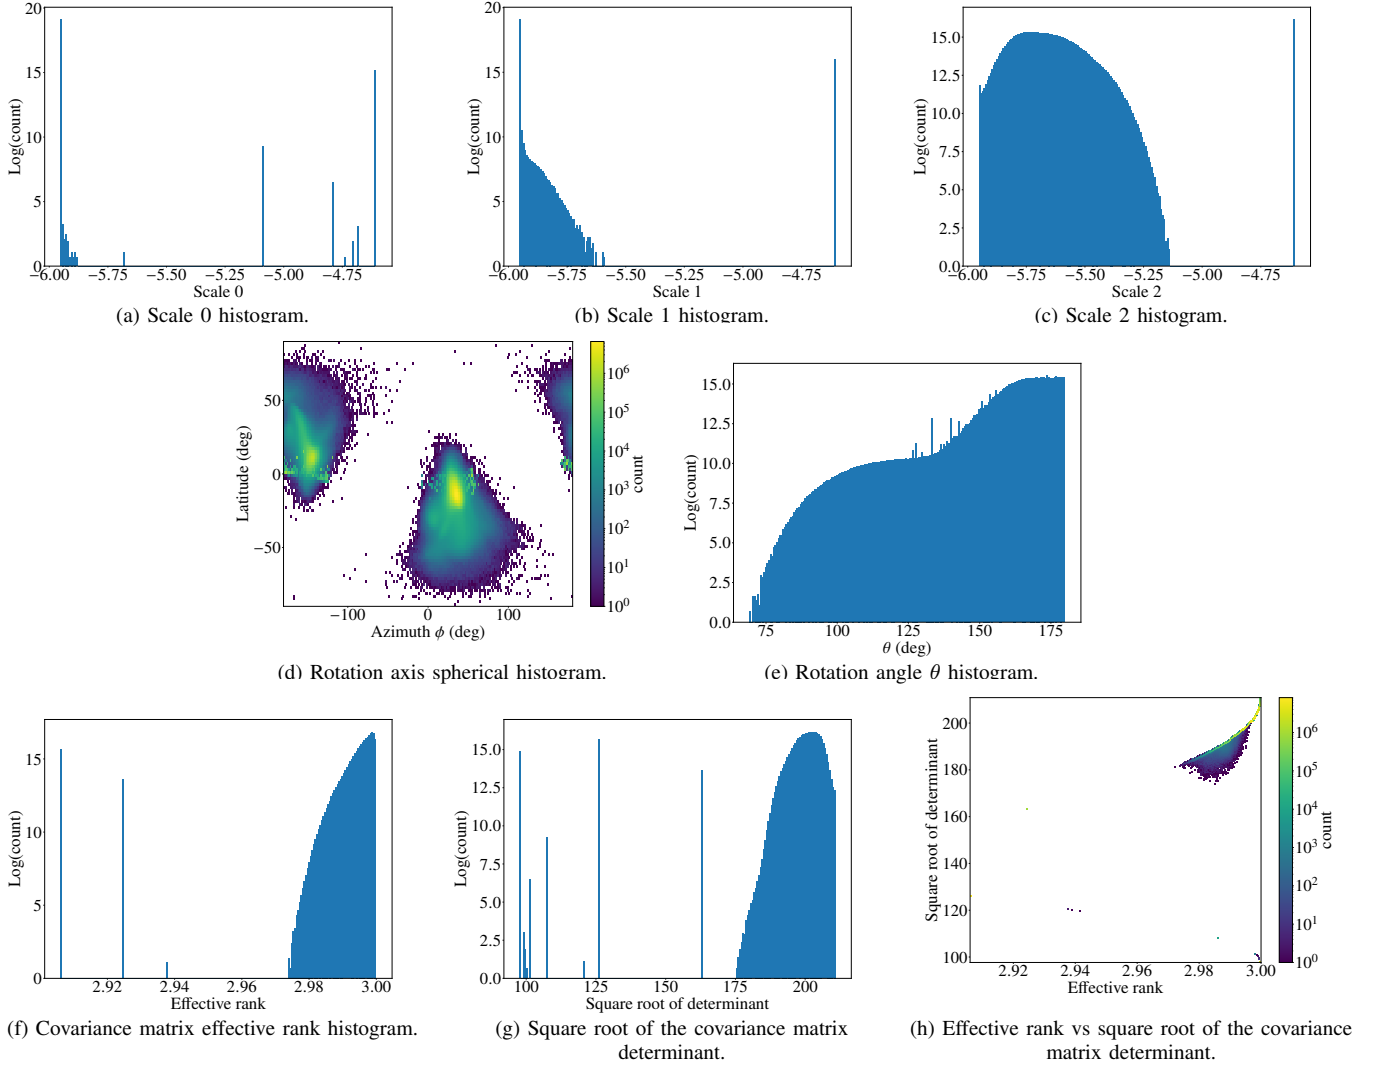

Fig. 5: Analysis of the Gaussian splats from Philipp's first dynamic reconstruction.

E. Philipp's Second Dynamic Reconstruction

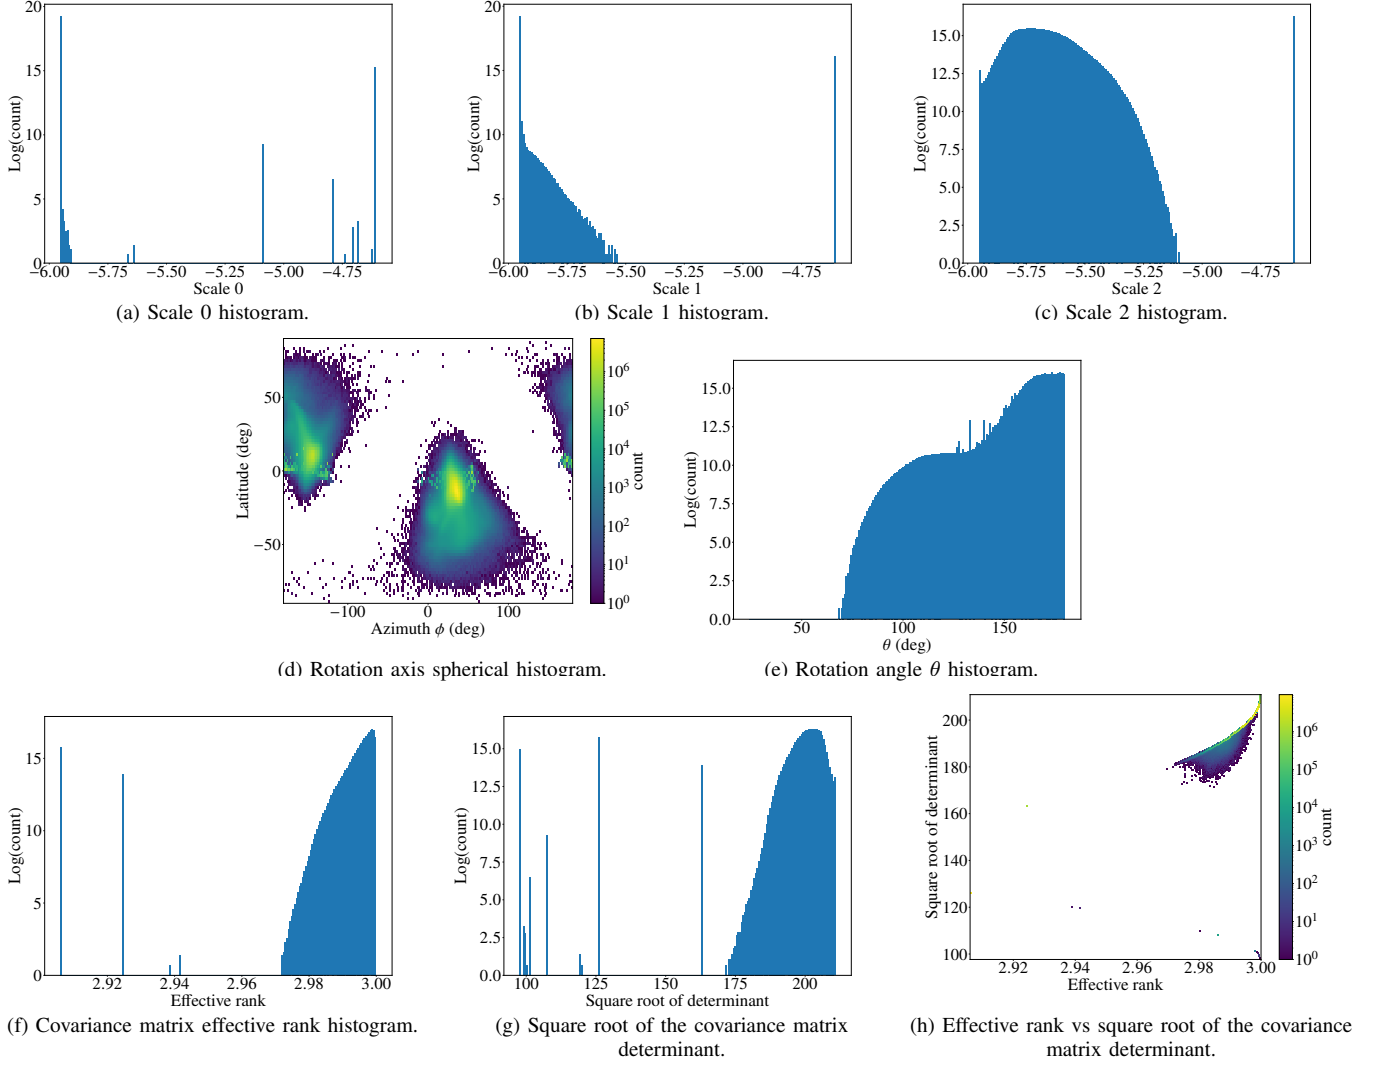

Fig. 6: Analysis of the Gaussian splats from Philipp's second dynamic reconstruction.

F. Simone's Dynamic Reconstruction

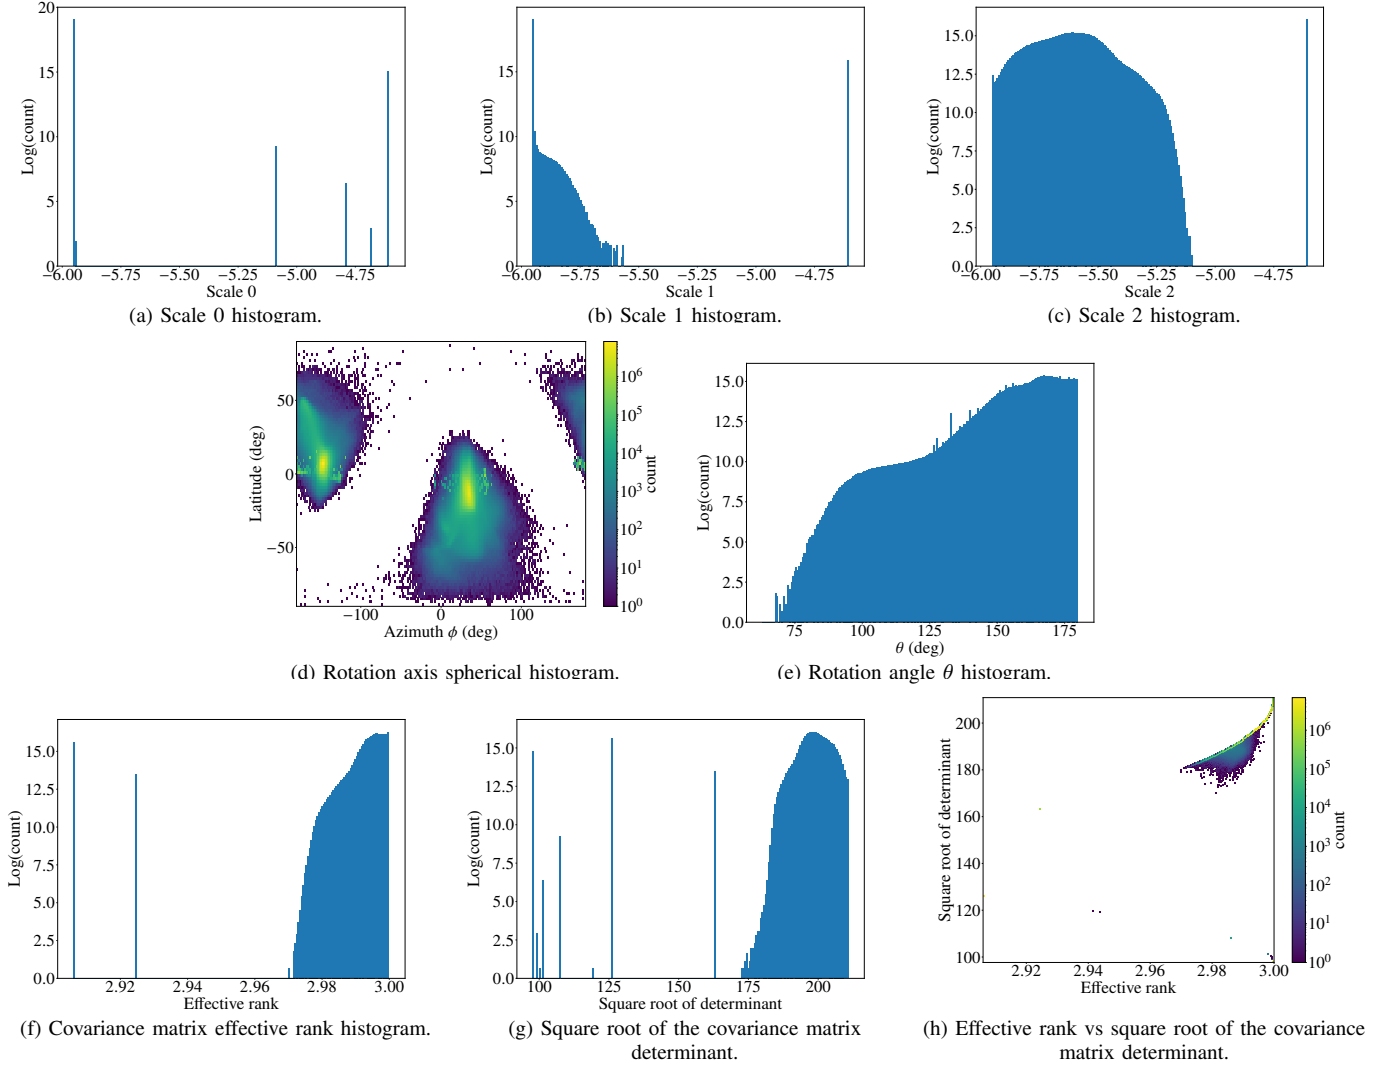

Fig. 7: Analysis of the Gaussian splats from Simone's dynamic reconstruction.

G. Thanos's Dynamic Reconstruction

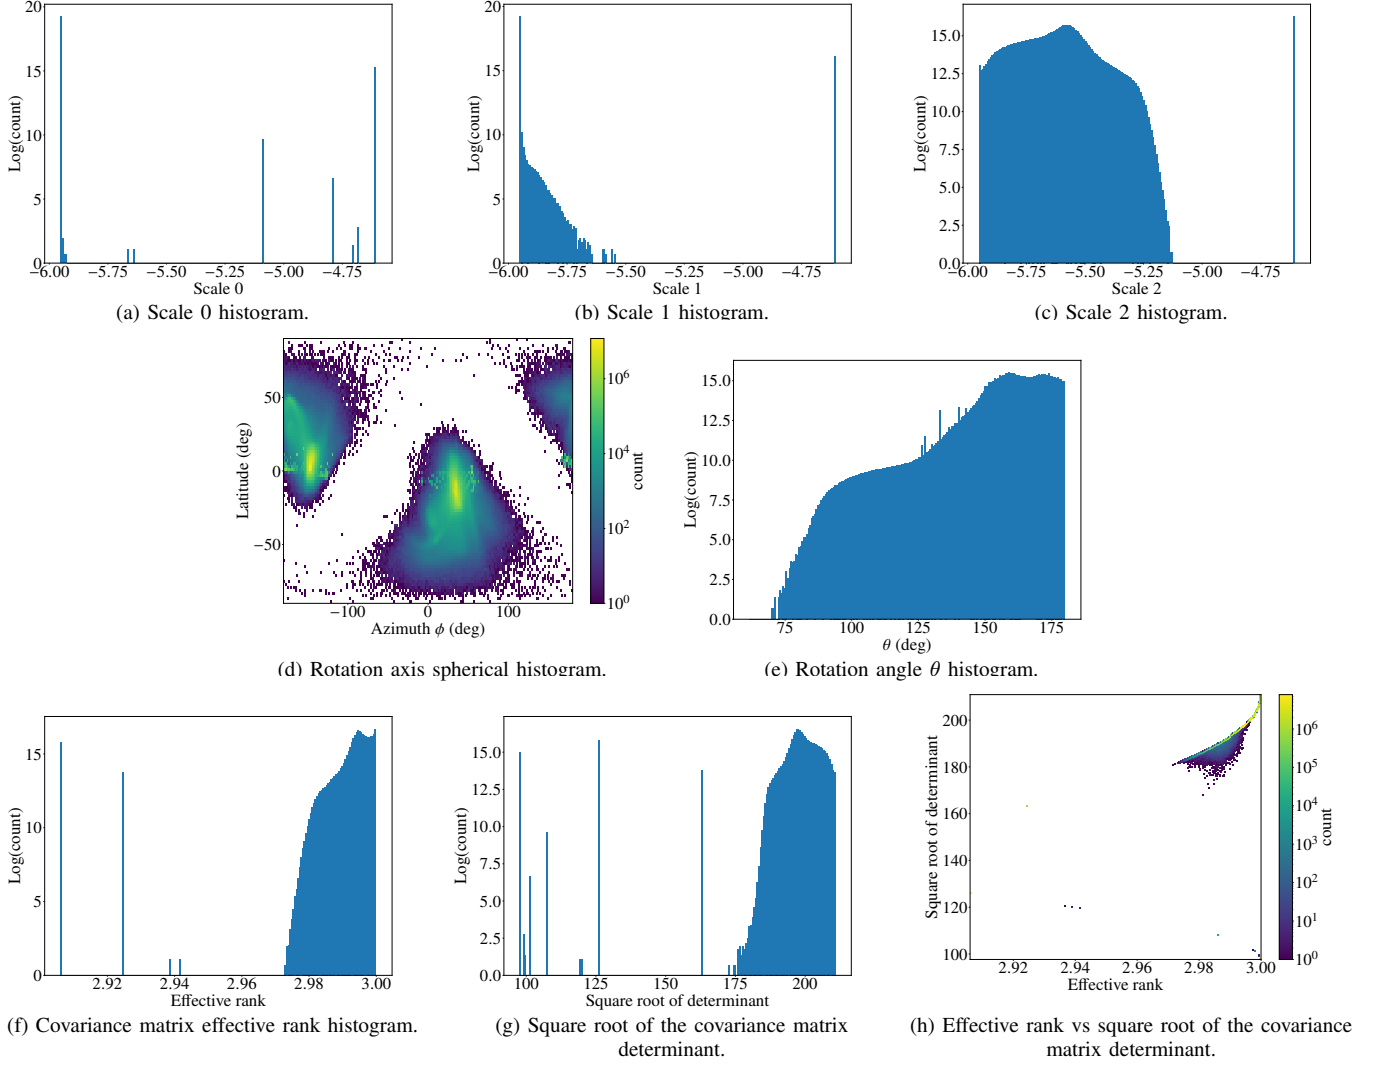

Fig. 8: Analysis of the Gaussian splats from Thanos's dynamic reconstruction.

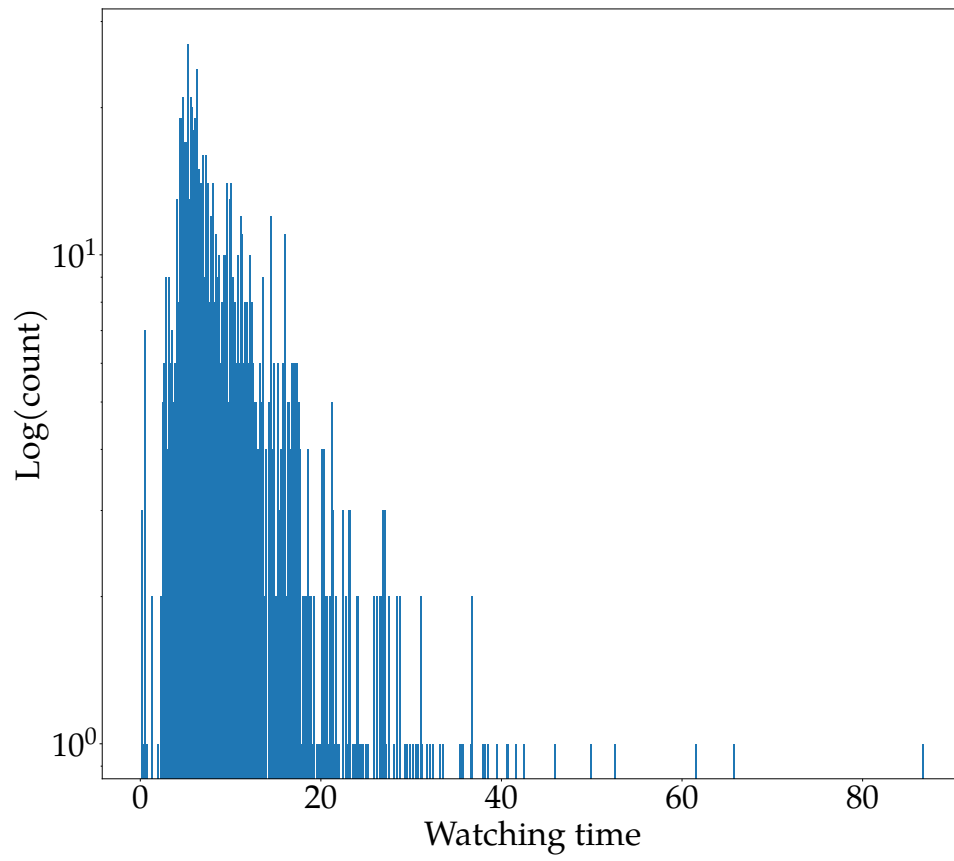

H. Stimuli Watching Time

Fig. 9: Stimuli watching time histogram.

III. GAUSSIAN SPLAT ANALYSIS OF STATIC RECONSTRUCTIONS

A. All Static Reconstructions

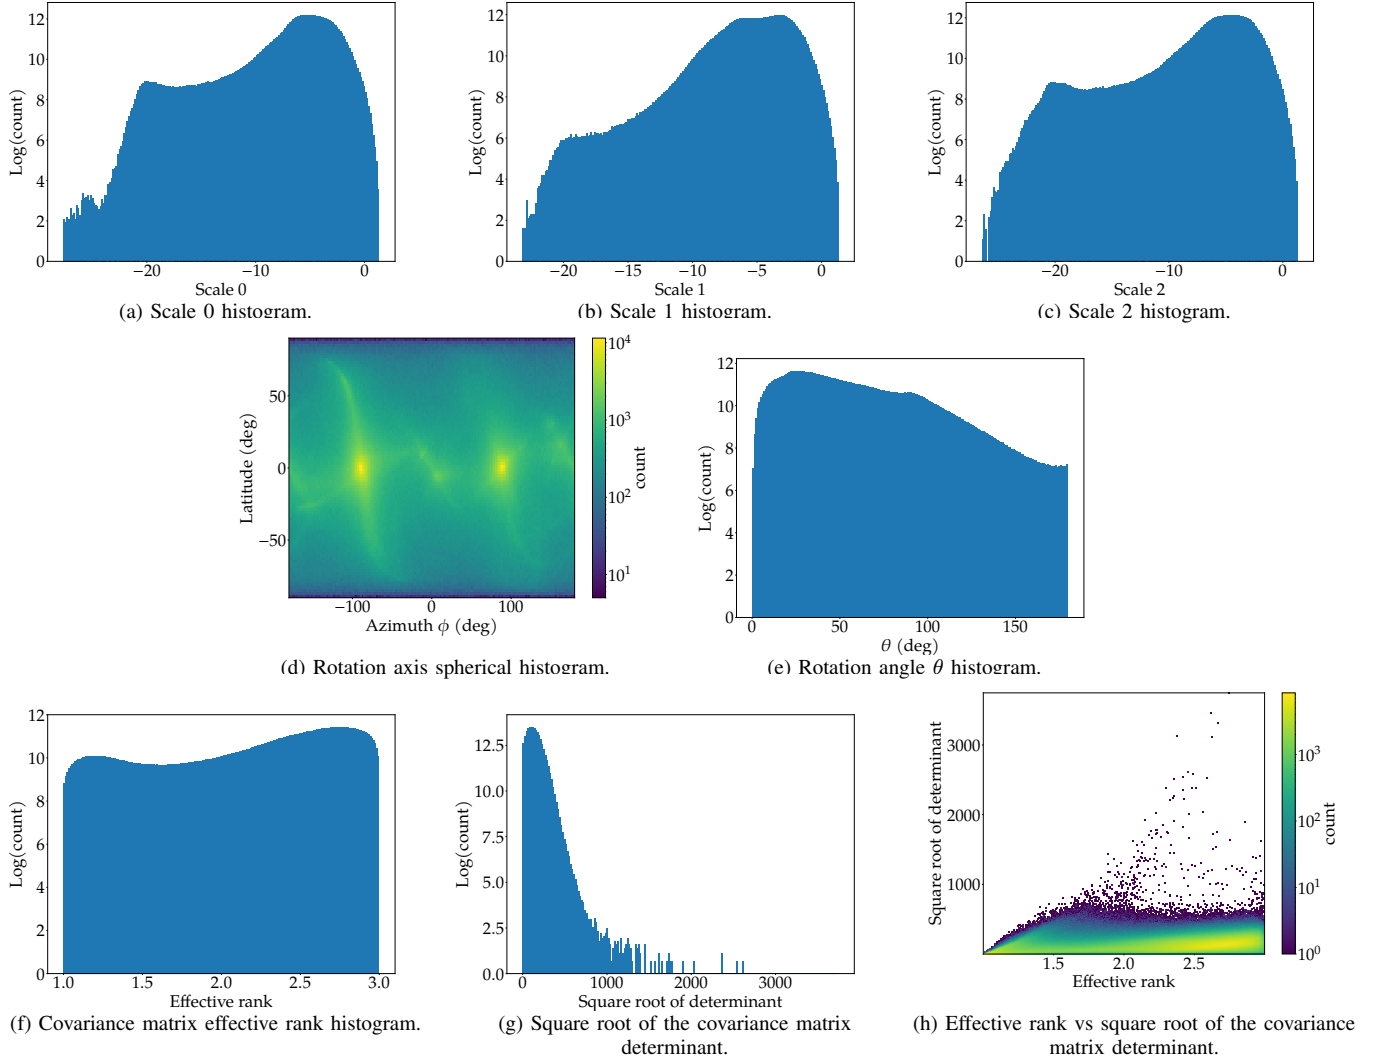

Fig. 10: Analysis of the Gaussian splats from all static reconstructions.
